ongoing deterioration/treatment required 2-5 years  re-inspect in 5 years
artistic or historic significance  prominent  monitor

SUMMARY: The concrete slab top cover is covered in layers of thick white paint and the painted surface has mildew patches. The concrete underneath has a rough surface which may indicate losses of concrete or covered decorations. There are cracks with growing vegetation in the paint layers and the cover and base of the vault are separating. Mildew should be washed off and painted should be removed. Concrete should be examined after exposure.
