COMMENTS

CONSERVATION PRIORITY (circle all that apply):
hazardous/immediate action  unstable deterioration/ASAP
ongoing deterioration/treatment required 2-5 years  re-inspect in 5 years
artistic or historic significance  prominent  monitor

SUMMARY: Inscription on headstone is difficult to read – layers of painting; white paint flaking off headstone, base, primary structure, and post; S side of primary structure revealing blue paint beneath white; the forms/edge of base are wooden boards on all four sides; posts at each corner are badly rusted; unknown if posts supported a roof or an enclosing chain; small curb of basalt rocks outlines base; possible cracks in surface of primary structure (most likely in paint layers, not concrete).
